PROFESSIONAL SUMMARY

I am an experienced Self taught Developer with an extended knowledge of programming, desktop application, web applications, and mobile application. With a diverse and promising set of skills. Competent in a variety of platforms, programming languages, and embedded systems.
Capable of managing myself effectively during independent projects as well as collaborating with a team.
I also have over 6 years of experience in programming and design. Excellent reputation for resolving problems and improving customer satisfaction.

WORK HISTORY

01-2018 - 05-2022	Web Developer Full stack, Benin City ● I contributed to the python Flask framework. This you can find in my repository ● Removing and fixing bugs from a collaborated Django project. ● I am able to work with a team and also work as a lone wolf, being a full stack developer. ● My strength lies on the backend of development. This makes My code very readable and well documented. ● I found and contributed to the fixing of a css bug in my hackathon challenge. This proves my ability to work on the front end. ● Development and adding a chatting functionality to the mobile application ● Contributed to the splinter python framework which is use for web scraping
02-2015 - 11-2020	Software Developer Benin City ● Contributed to the design and development of desktop messenger application. ● With the use of Kotlin, I developed a marketplace mobile application, where sellers and buyers can meet ● With the use of Flutter I developed a facebook clone to show how skillful I am with flutter ● With the use of flutter I have developed a cross platform application, which is very responsive. ● By attempting to try a new skill I developed a mobile game with unity engine, using C#. ● Created a module that fixed the issue of the tkinter menu not being able to display color in Windows. link

EDUCATION

2012 - 2015	Senior School Certificate, Edo State, Nigeria
